car spare parts online

online car spare parts online store that are condain , Buying spare parts for car anytime & anywhere using webpage, user can search or browse the part it shows some of parts with information with it if its original or first class or second class parts.

Problem
The idea I found it out because some of distributor in some areas in my country don't have all the spare parts and if they have it, they take a lot of time or maybe days. Some of people paying for taking their cars to another cities, spend a lot of money and losing time, some of spare shopping they play with prices so it safe idea for stable prices on parts. Besides that , the idea is broker between distributor or even scrap used original parts and try to help customers 24/7 as possible satisfy and saving time, effort & money.

Proposed system:

Stable prices by choosing which part level the customer wants & flexible to choose the price the customer want. Using heat map tools & we remove all the clutter that can distract our visitor allow them to get a good feel for your company and the products we're selling. Competition of large shops at the lowest cost, where your website will open 24 hours a day, 7 days a week. Your competitors in the same field, starting to sell through the Internet, will remain away from technology and less than them.

Users in the project:

Admin:

Admin has the whole powers to manage the system.He has to power to add a various spare parts product.

User:

User have to power to buy any product in the website.

Objectives:

-Time Saving.

-Money Saving.

-The online market works for 24x7x365 days a year. This means you don't have to worry about the time and can shop anytime from anywhere. All you need is working internet connection.

-Online buying of car parts gives bigger reach and without worrying about the distances.

-In the online marketplace, you can find suppliers offering thousands of products from braking components to engine to other accessories along with the price list

-Compare items & prices easily.

-Easy to use and navigate
